

3.11 Link Entities and Link Static Entities

LINK ENTITIES

This action allows to relate between them 2 dynamic entities that present a relation N - N. The 2 entities do not present a field related to each other, but the relation to N. (Figure 1)

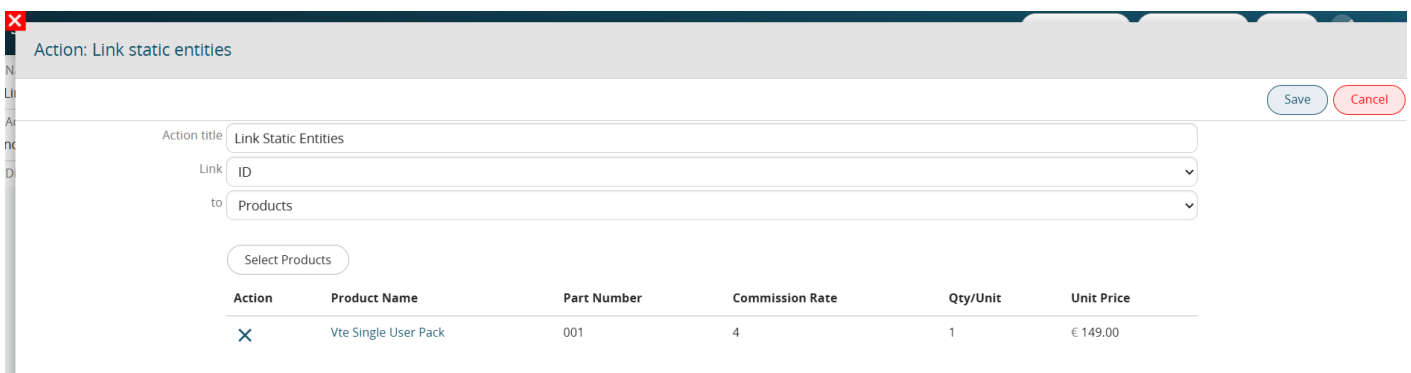

Figure 1

LINK STATIC ENTITIES

This action makes it possible to relate one or more static entities among those proposed to a dynamic process entity.

It is useful for example to relate entities common to more than one case of the flow itself, e.g. Report the same document (privacy statement, checklist, etc.) (Figure 2)

Action	Product Name	Part Number	Commission Rate	Qty/Unit	Unit Price
X	Vte Single User Pack	001	4	1	€ 149.00
