

3.13 Insert Table Row and Insert Product Row

INSERT TABLE ROW

This action allows you to insert rows in a table field (Figure 1 and 2)

NOTE: if there is no table field in the main entity involved in the process and its related module, the action will not be visible among the list of actions selectable via the "New Action" button.

The values entered can be static and/or dynamic (taken from the entities involved in the process).

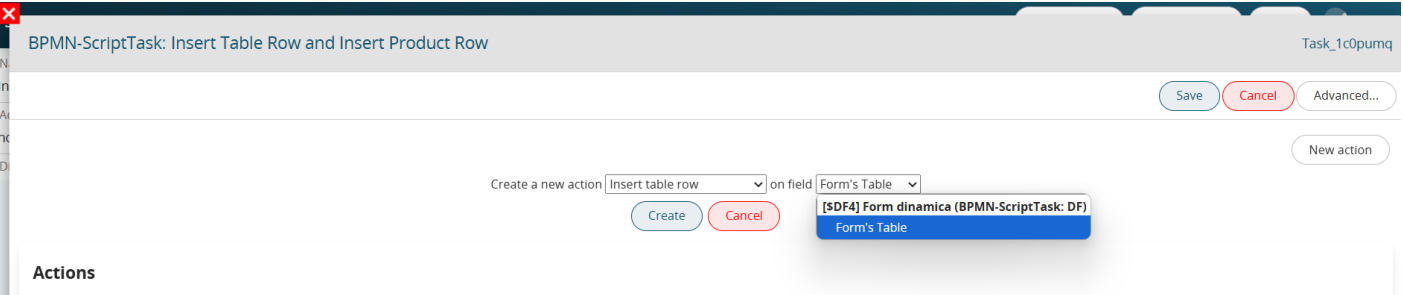

Figure 1

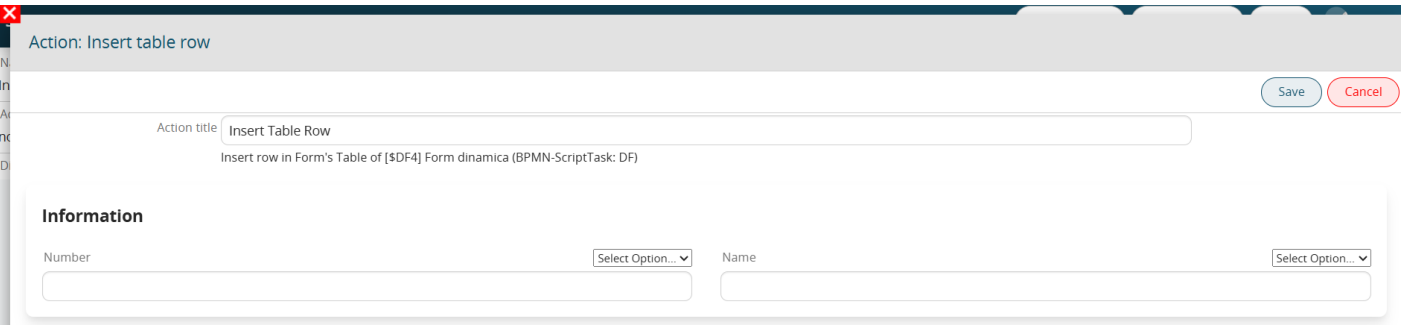

Figure 2

INSERT PRODUCT ROW

This action allows you to insert rows in a product block (Figure 3 and 4)

NOTE: if there is no product block in the main entity involved in the process and its related module, the action will not be visible among the list of actions selectable via the "New action" button.

The values entered can be static and/or dynamic (taken from the entities involved in the process).
