

4.7 2-FACTOR AUTHENTICATION FLAG

Allows you to request 2-factor access to confirm and save the data entered in the dynamic form of the process helper (Figure 1, 2 and 3).

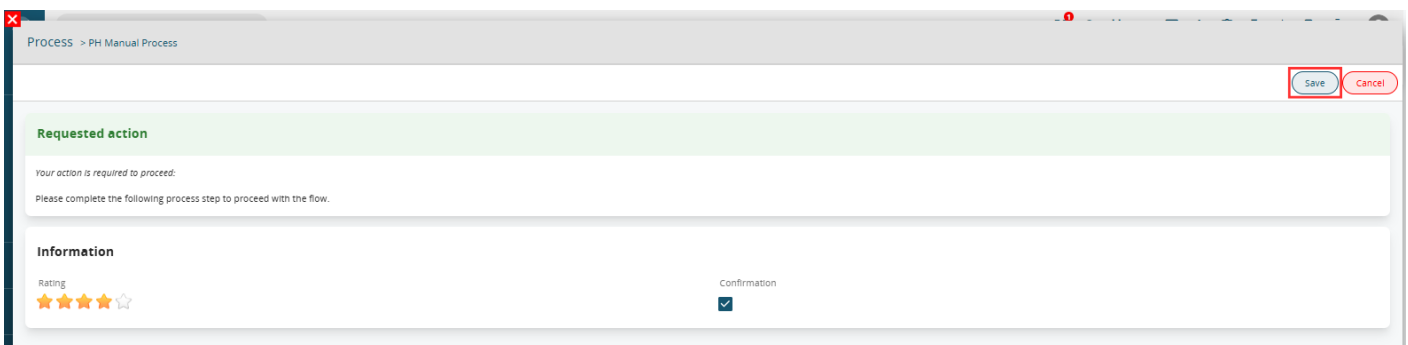

In order to use it, the user assigned to the process helper must have 2-factor authentication activated in their user preferences.

For further information on the activation procedure and the related usage possibilities, see chapter 2.7.2 of the Vtenext general manual.

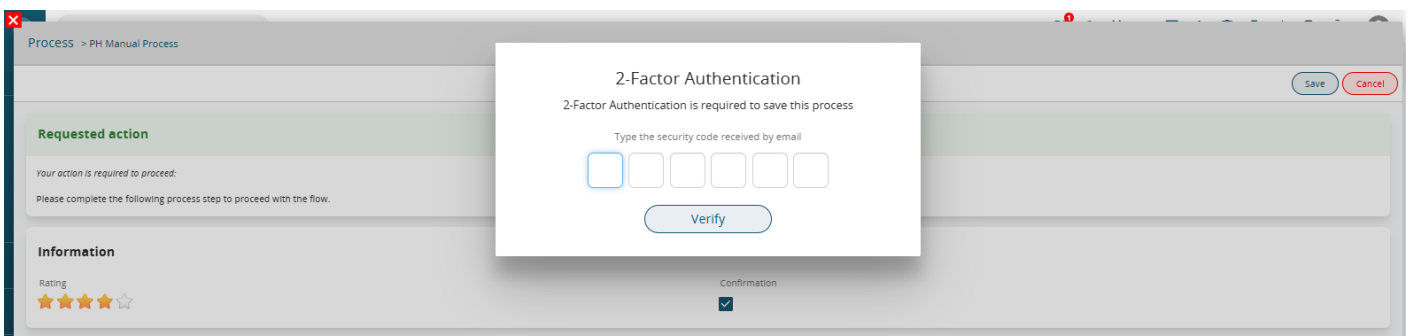

The screenshot shows the 'Process Helper' configuration interface. It includes fields for 'Assigned To' (User: billotommaso@gmail.com (Tommaso Billo)), 'Related to' (\$28-crmid), and 'Status' (Running). There are checkboxes for 'Show in the related entity' and 'Show documents of the related entity'. A red box highlights the '2-Factor Authentication' checkbox, which is checked.

Figure 1 (click on the image for a higher graphic resolution)

The screenshot shows the 'Process Helper' form with a 'Requested action' section. The text reads: 'Your action is required to proceed: Please complete the following process step to proceed with the flow.' Below this is an 'Information' section with a rating of 5 stars and a confirmation checkbox that is checked. 'Save' and 'Cancel' buttons are visible in the top right corner.

Figure 2 (click on the image for a higher graphic resolution)

The screenshot shows the 'Process Helper' form with a '2-Factor Authentication' modal dialog box. The dialog contains the text: '2-Factor Authentication is required to save this process. Type the security code received by email.' Below this is a row of five input boxes for the security code and a 'Verify' button. The background form is dimmed, showing the 'Requested action' and 'Information' sections.
