User preferences

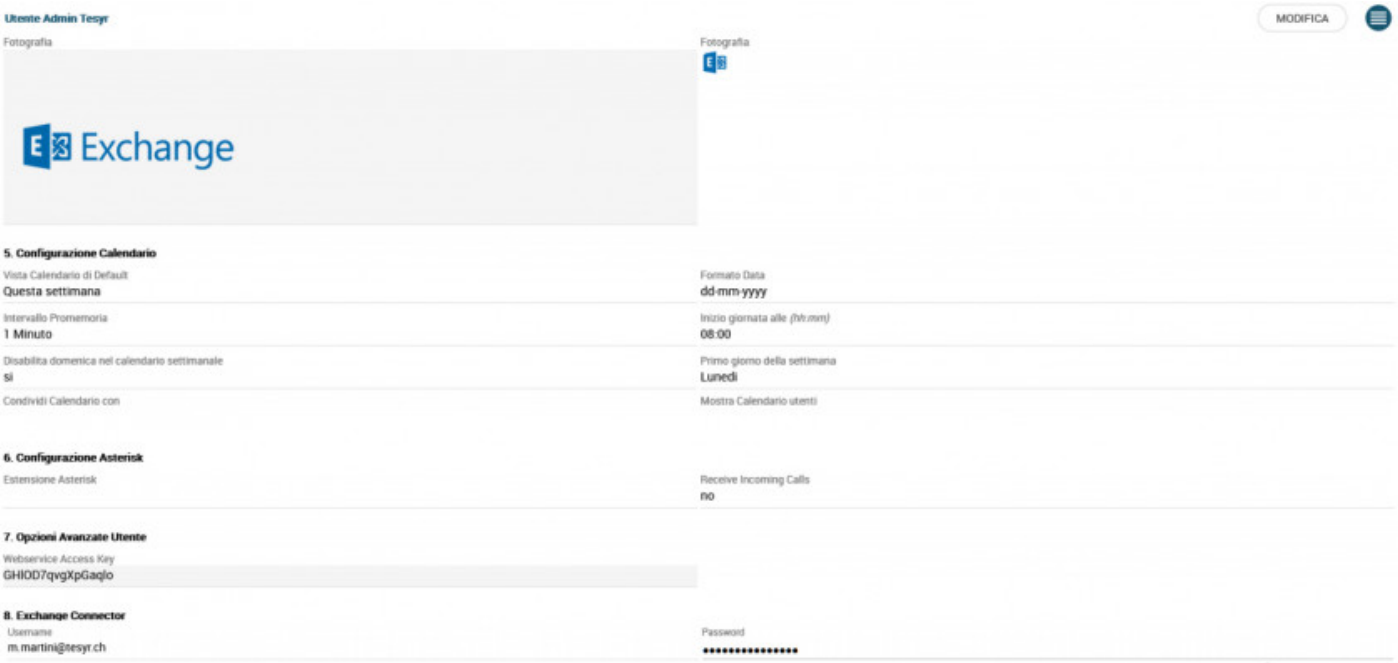

User preferences with Office 365 authentication

User preferences with Office 365 authentication PopUp orAuth2 MS

User preferences with authentication via ntlm or basic protocol for Exchange on premise

WARNING: Once a user has been configured, **it is no longer possible to modify the folder mapping for Contacts, Tasks, and Events**. To change this mapping, manual intervention by technical support is required, including resetting the user's entire configuration. We therefore strongly recommend correctly setting up user folders from the very beginning.
