Sync Calendar with Google Calendar

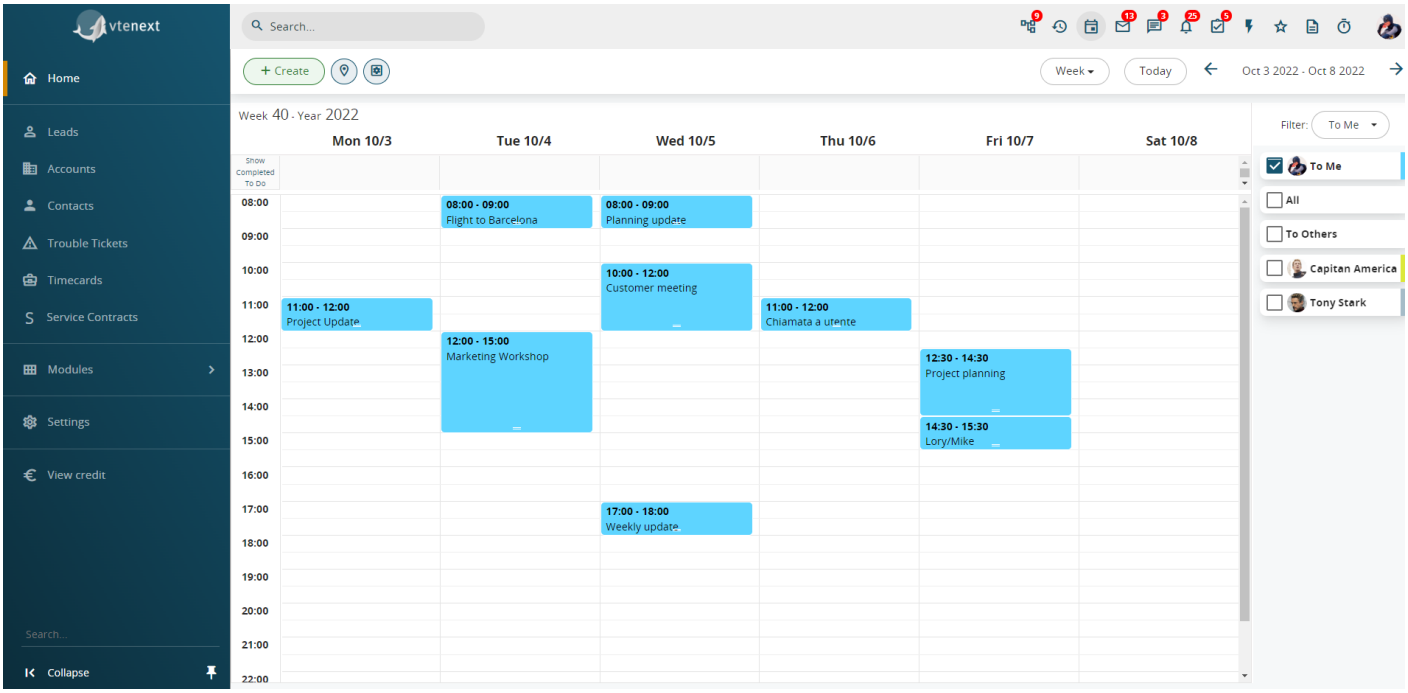

Are you working with Google Calendar and you want to sync with vtenext calendar ? Thanks to this additional module you can make it possible!
Once you have installed the additional module, inside the user preference, you can insert username and password of your Google Account, in order to connect Google Calendar.
Whithin user preference, you will find a new block, named "Synchronization Calendar" that will allow to enter the credential previously mentioned. When you have entered your credential and saved the configuration the two calendars will begin the syncronization process.

Google Calendar configuration block in the User Preference

Screenshoot of Google Calendar (events in the color blue are present also in vtenext)

Screenshoot of vtenext Calendar with syncronized events
