

# License Activation or Trial 30

The plugin requires the activation of a license, either trial or production, with Pantarei Informatica. This license can always be requested independently by clicking the Register button and filling in the required fields in the Form that appears as a PopUp.

The request includes: online mode with email verification via OTP or manual insertion of a key previously released by Pantarei Informatica or requested by phone, by communicating the Product ID of your vtenext instance that appears on the screen. The trial license will be released automatically for 30 days with unlimited users. Simply click the update license button immediately after verifying the email. When requesting a production license, you will then be asked for the number of users that will use the plugin.
