

License Assignment

Once the license has been activated for the selected number of users, it will be possible to assign this license to the CRM users who will use the service. Simply click the “Assign license” button, select the users to whom we want to assign it, and save the setting by clicking the Assign button.

The screenshot shows a web interface for license management. At the top, there is a section titled "Impostazioni globali" (Global Settings) with two dropdown menus: "OAuth Mode" set to "proxy" and "Default Google Meet" set to "ON". Below these is a "Salva" (Save) button. The main section is titled "Licenze per utente" (Licenses per user) and shows "Posti disponibili: Illimitato" (Unlimited available seats) and "Usati: 0" (0 used). Below this is a table with columns "Utente" (User), "Nome" (Name), "Email", and "Azione" (Action). The table is currently empty, with the text "Nessun utente assegnato" (No user assigned) below it. A "+ Assegna nuove licenze" (Assign new licenses) button is highlighted with an orange circle. Below the table is a "Log sincronizzazione e licenze" (Synchronization and licenses log) section showing a single entry: "[2026-02-24 19:39:10] Sync error: no valid OAuth token - {\"user\": \"admin\", \"userId\": 1}". At the bottom, there is a "Disinstallazione modulo" (Module uninstallation) section with the text "Esegue la disinstallazione del modulo. Le configurazioni e gli eventi già sincronizzati non verranno eliminati." (Executes the module uninstallation. Configurations and already synchronized events will not be deleted.) and a "Disinstalla modulo" (Uninstall module) button.
