

Synchronization Logs and Plugin Uninstallation

Once synchronizations are activated, the admin will be able to check the latest logs to monitor possible problems. The logs will also show any connection issues with the Pantarei License server.

Log sincronizzazione e licenze

```
[2026-03-03 22:47:07] Sync OK - {"user":"s.ricotta@pantareisrl.com","userId":10}
[2026-03-03 22:47:06] Sync OK - {"user":"gabriele@pantareisrl.com","userId":4}
[2026-03-03 22:47:06] Sync OK - {"user":"melux96","userId":7}
```

The plugin provides the possibility of self uninstallation.

This procedure will remove all plugin files and the database tables created.

Only the Google mapping fields will remain, in order to avoid duplicates in case of plugin reinstallation.

Disinstallazione modulo

Esegue la disinstallazione del modulo. Le configurazioni e gli eventi già sincronizzati non verranno eliminati.
