

1.6 vtenext Business 18.12

Release Note

NEW INTEGRABILITY

vtенext becomes more and more a platform able to bidirectionally communicate and connect with the other solutions adopted. This is a relevant feature to allow the spread of the CRM logic and processes in all the areas of the organization.

New standard REST API to ease the integration with other systems, implementation without temporary token and important improvements of the log in procedure, all this together with further developments (meta-done solution), make vtenext a complete solution able to communicate with all the solution used within the organization.

- modules versioning, roles, profiles and conditionals fields;
- New **“note” widget**, with more intuitive design and functionalities;
- Drag and Drop upload function of single and multiple files with automatic file compression;
- **Quick Look Relations**, with a preview pop up containing all the relational fields; - CDN feature thanks to which all images and eventual static contents can be distributed through CDN or be on a different server;
- **CDN** feature thanks to which all images and eventual static contents can be distributed through CDN or be on a different server;
- the **Customer Portal**, simplified developments, SDK functions use and the possibility to read conditional fields;
- **Dynamic Forms**, with import blocks and form fields in dynamic forms;
- **GDPR**, with support to the Business Units;
- vtenext 18.12 offers better performances thanks to the PHP 7.2 support.
