

Configuration Detail Page

Open an existing configuration to view its detail page.

[Configuration detail page](#)

Button Configuration displays the quick-action buttons shown during calls. Click **Add Button** to define its title, colour, icon, and action, such as opening an existing record or creating a related record.

Buttons can be reordered by dragging them. Click an existing button to edit or delete it.

The page also summarises role visibility, active status, assigned user, popup fields, linked-module mentions, and the internal description.

Revision #1
