

12.1 Job Orders

From vtenext 20.04 the new module Job Orders is now available. The module is linked to the Project Plans one. In this way more than one project plan can be related to the same Job Order.

The screenshot shows the 'Job Order Ristrutturazione biblioteca' interface. The top navigation bar includes a search bar and various icons. The main content area is divided into three sections: 'Job Order Information', 'Description Information', and 'Talks'. The 'Job Order Information' section contains fields for Job Order Name, Status, Created Time, Assigned To, Job Order No, Related To, Modified Time, and Creator. The 'Description Information' section has a Description field. The 'Talks' section has a 'Start a new talk' button. A right sidebar shows 'SHORTCUTS' (Talks, Notes) and 'RELATIONS' (Project Plans, Documents, Activities, Processes). A bottom bar shows 'Notes - Slider' and a '+ CREATE' button.
