

14.1.2 Insert tables in PDF

To create a table in the PDF Maker, simply use the appropriate function in the editor, which is highlighted in the following image:

When the "table creation" icon is clicked, a dialog window will open that will allow us to enter the values of the specific table we want to create:

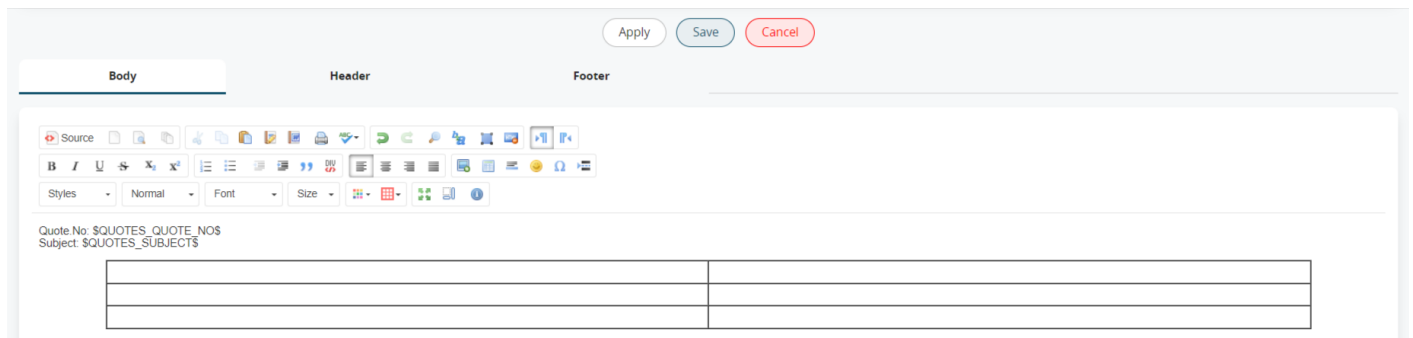

A screenshot of the 'Table Properties' dialog window. The window has a title bar with 'Table Properties' and a close button. Below the title bar are two tabs: 'Table Properties' and 'Advanced'. The 'Table Properties' tab is active. The dialog contains several input fields and dropdown menus for configuring a table. The 'Rows' field is set to 3, 'Columns' to 2, 'Width' to 90%, and 'Cell spacing' to 0. The 'Headers' dropdown is set to 'None', 'Border size' to 1, and 'Alignment' to 'Center'. There are also fields for 'Caption' and 'Summary'. At the bottom of the dialog are 'OK' and 'Cancel' buttons.

Border dimension	put zero if you do not want to display the border
Cells spacing	space between cells

Cells Padding

space between the border of the cell and the beginning of the content (text)

When you click OK, the table appears in the BODY tab of the editor.

Right-click to change the properties of the table. You can also set properties solely for the cell where the cursor is located.
