

17.11 Encrypted Field Editor

The encrypted field editor allows you to protect the content of a field by means of an access password. The user can only access the contents of the field after entering the password.

The screenshot shows the 'Settings > Encrypted fields' page. The breadcrumb trail is 'Settings > Encrypted fields' and the page title is 'Encrypted Field Editor'. A vertical sidebar on the left contains icons for home, list, user, document, chart, globe, and key. The main content area displays the message 'No encrypted fields. Click Add to create a new one' and an 'Add' button in the top right corner.

Choose the module and the field of interest and enter the password:

The screenshot shows the 'Settings > Encrypted fields' page with the 'Create' and 'Cancel' buttons in the top right corner. The main content area contains the following form elements: 'Choose a field to encrypt:' with 'Module: Accounts' and 'Field: Description' dropdowns; 'Choose the password used to decrypt it:' with 'Password' and 'Confirm password' input fields; and an 'Alert: If you forget the password, data will be lost and cannot be recovered...' message at the bottom.

Warning! If you forget your password, the data can be recovered through technical assistance.
