

17.6.3 Import new language pack

The module manager allows you to import a new language package. The procedure below sets out the installation steps.

The screenshot displays the 'Settings > Module settings' interface, which is used to manage module behavior inside VTE and VTENEXT. The interface is divided into two main sections: 'Standard Modules' and 'Custom Modules'.

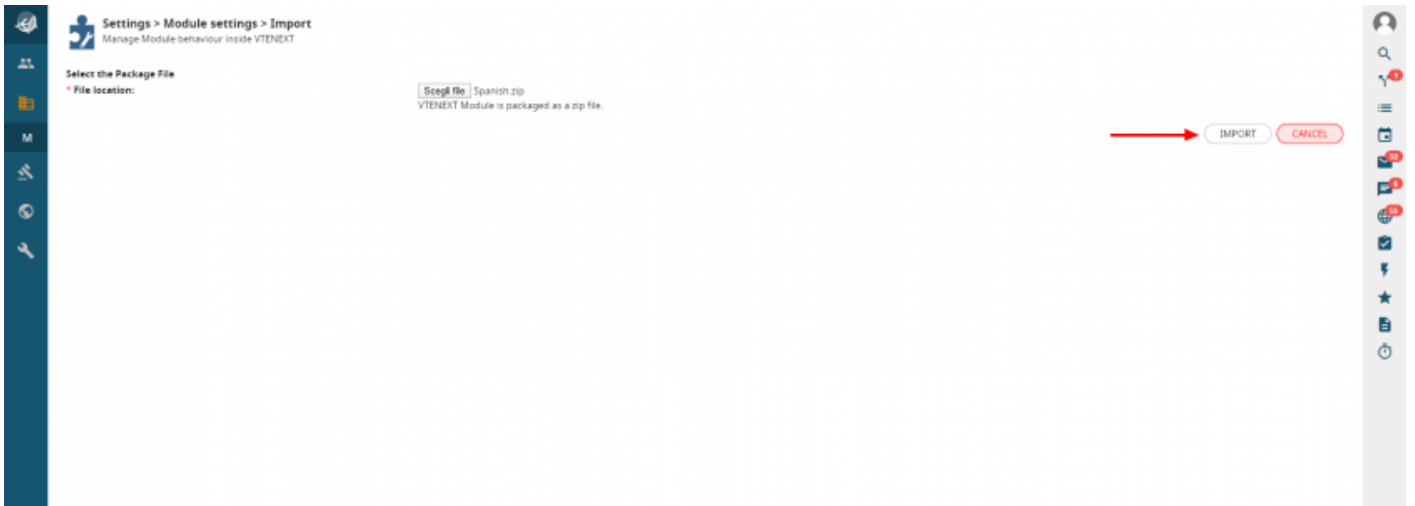

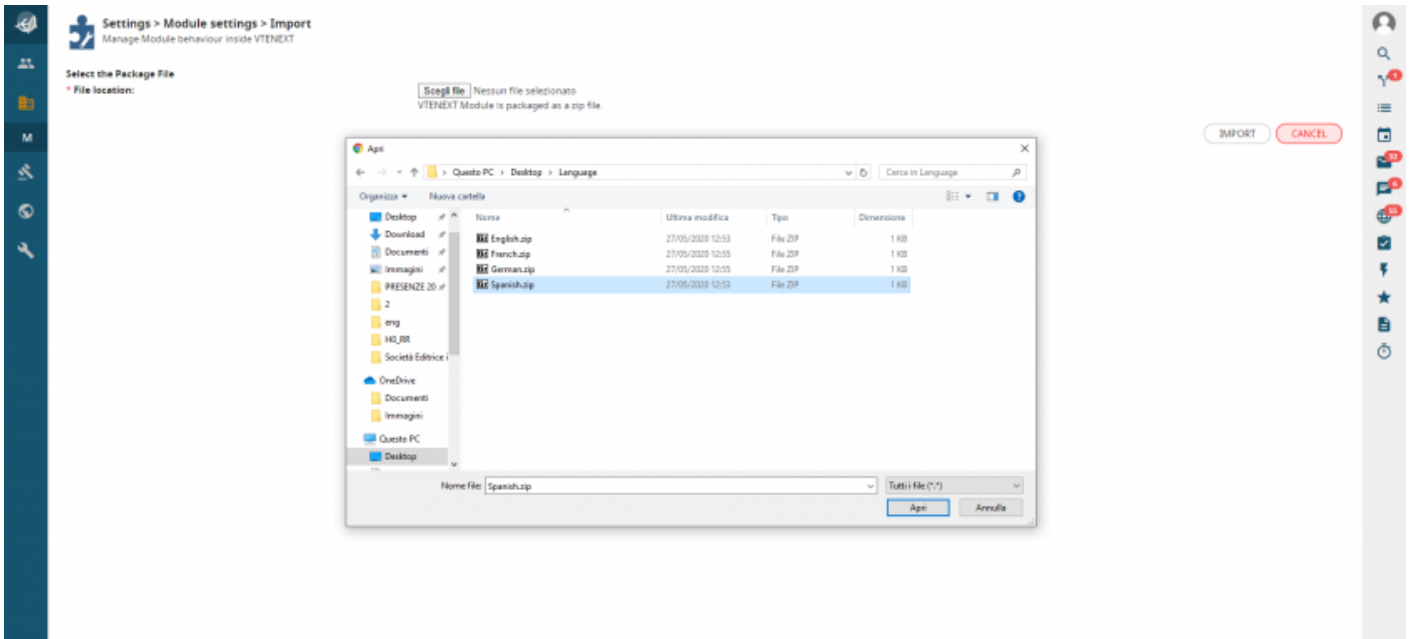

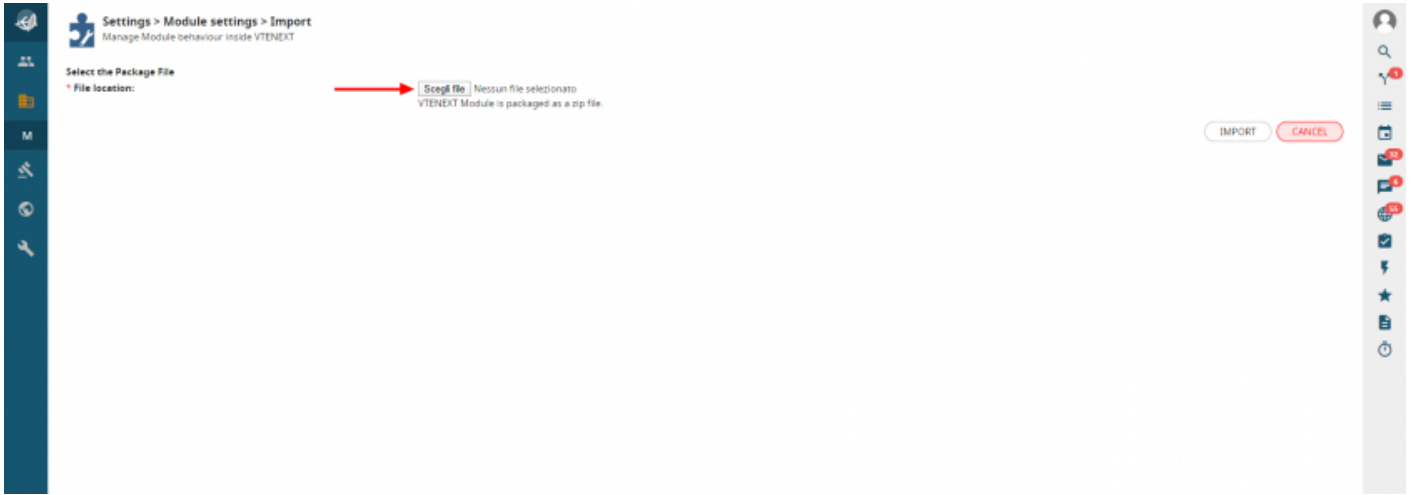

Standard Modules: This section lists various modules that are pre-installed or available for use. Each module has a checkmark and a gear icon. The modules listed are:

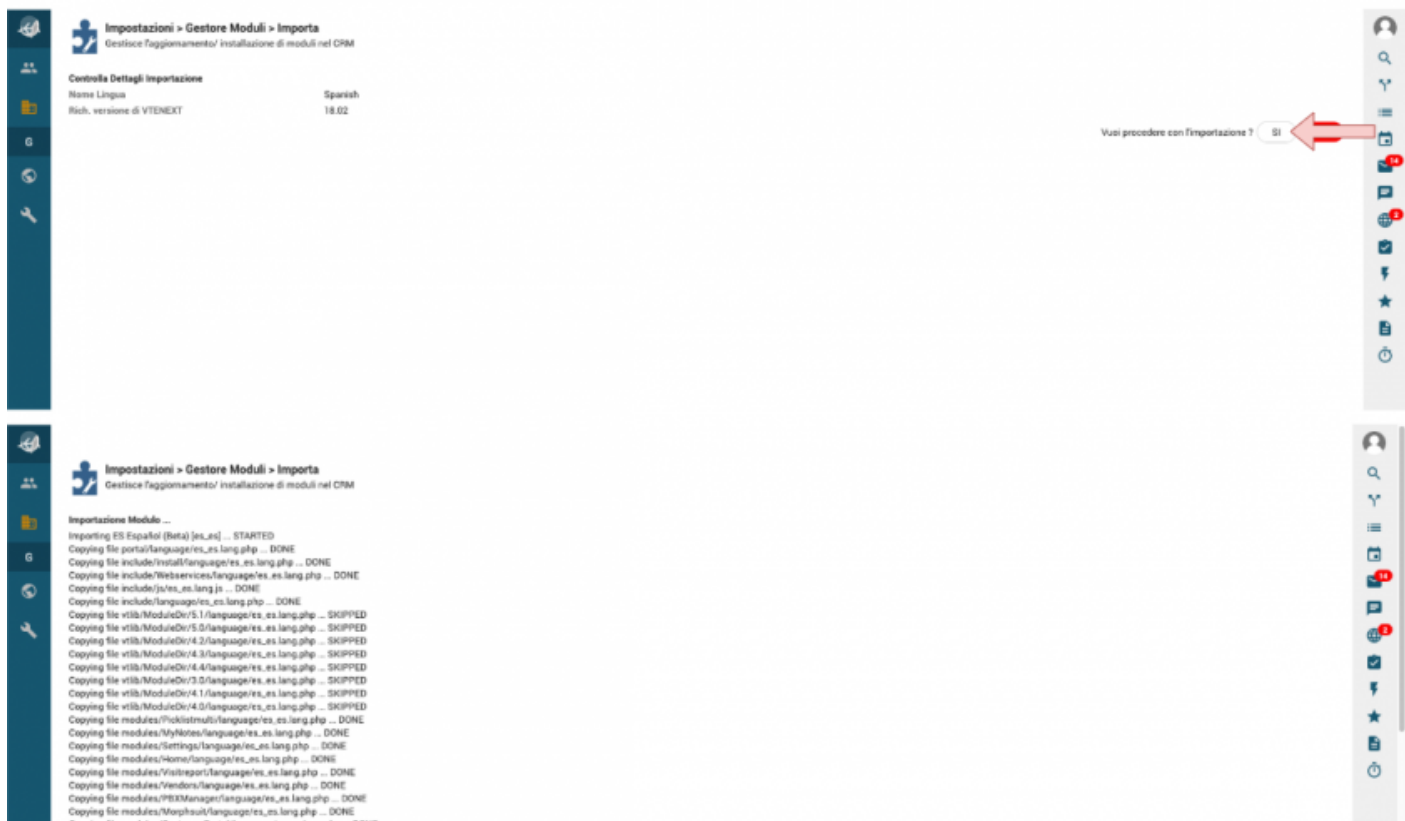

- Accounts
- Assets
- Calendar
- Campaigns
- Change Log
- Charts
- Conditionals
- Contacts
- CustomerPortal
- Delivery Notes
- Documents
- Email
- FAQ
- Fax
- Field Formulas
- Geolocalization
- Trouble Tickets

Custom Modules: This section is currently empty. A red arrow points to the 'Custom Modules' tab. Below this section, there are two buttons: 'IMPORT NEW MODULE' and 'CREATE NEW MODULE'. A red arrow points to the 'IMPORT NEW MODULE' button.

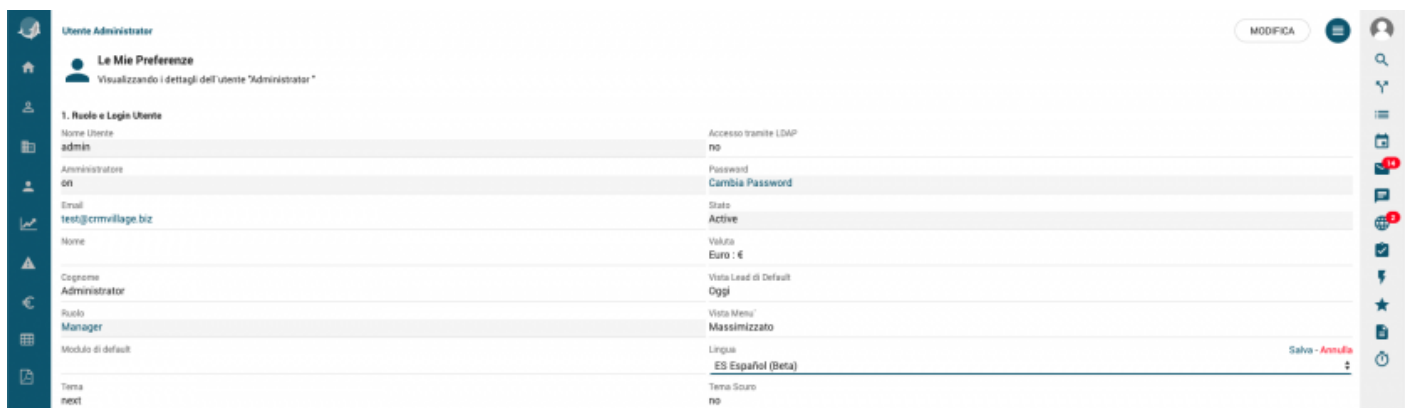

Language Packs: Below the 'Custom Modules' section, there is a list of language packs. Each language pack has a checkmark and a gear icon. The language packs listed are:

- IT Italiano
- NL Dutch
- DE Deutsch
- PT Português
- RU Русский (Beta)
- PL Polski (Beta)
- FR Français (Beta)
- ES Español (Beta)

The new language can be changed in the user preferences.
