

# 17.6.3 Import new language pack

The module manager allows you to import a new language package. The procedure below sets out the installation steps.

The image displays two screenshots of the module manager interface. The top screenshot shows the 'Settings > Module settings' page for YTE, with a red arrow pointing to the 'Custom Modules' tab. The bottom screenshot shows the 'Settings > Module settings' page for YTENEXT, with a red arrow pointing to the 'IMPORT NEW MODULE' button.

**YTE Module Settings**

Standard Modules
