10 Data always under control

The app functions therefore make it possible to manage data processing in self-service mode. Using vtenext as a HUB to collect information from external sources such as ERP, Ecommerce, Mailing Tools, Lead Collection Forms, guarantees unified management of the GDPR and independent maintenance of collected data and consent forms.

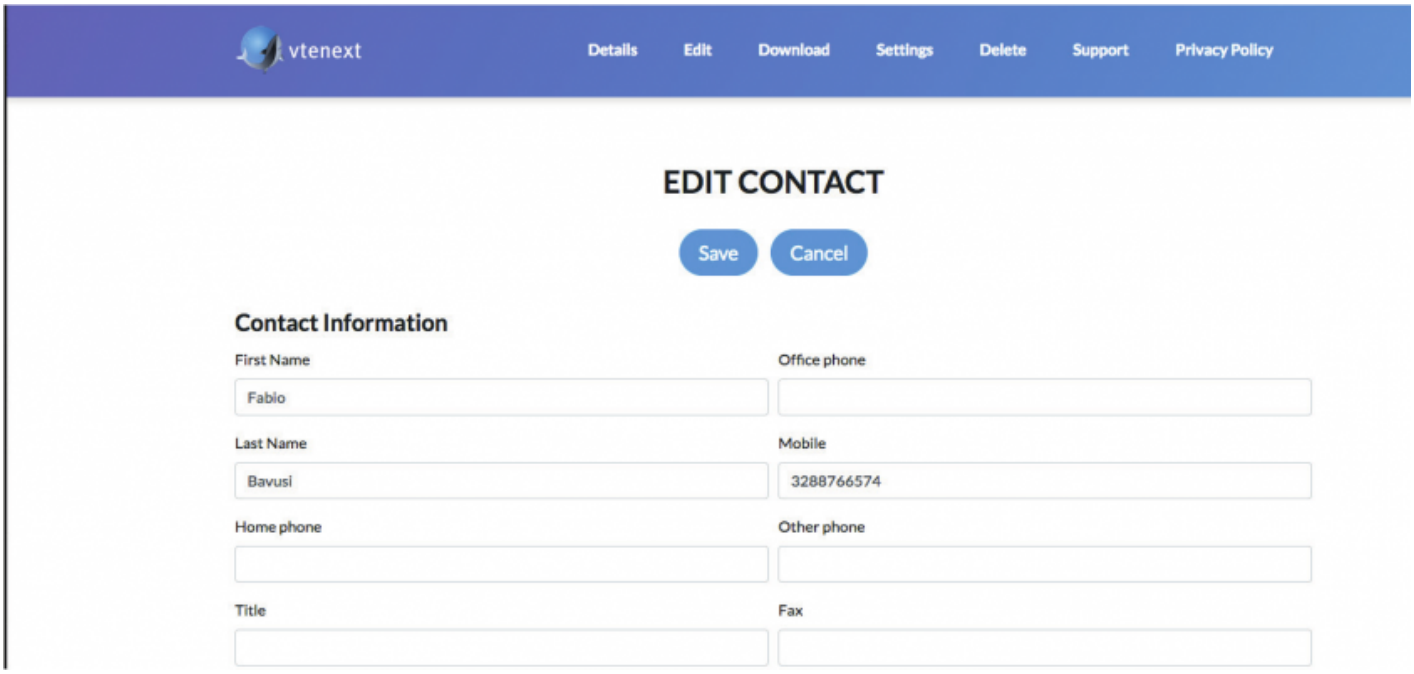

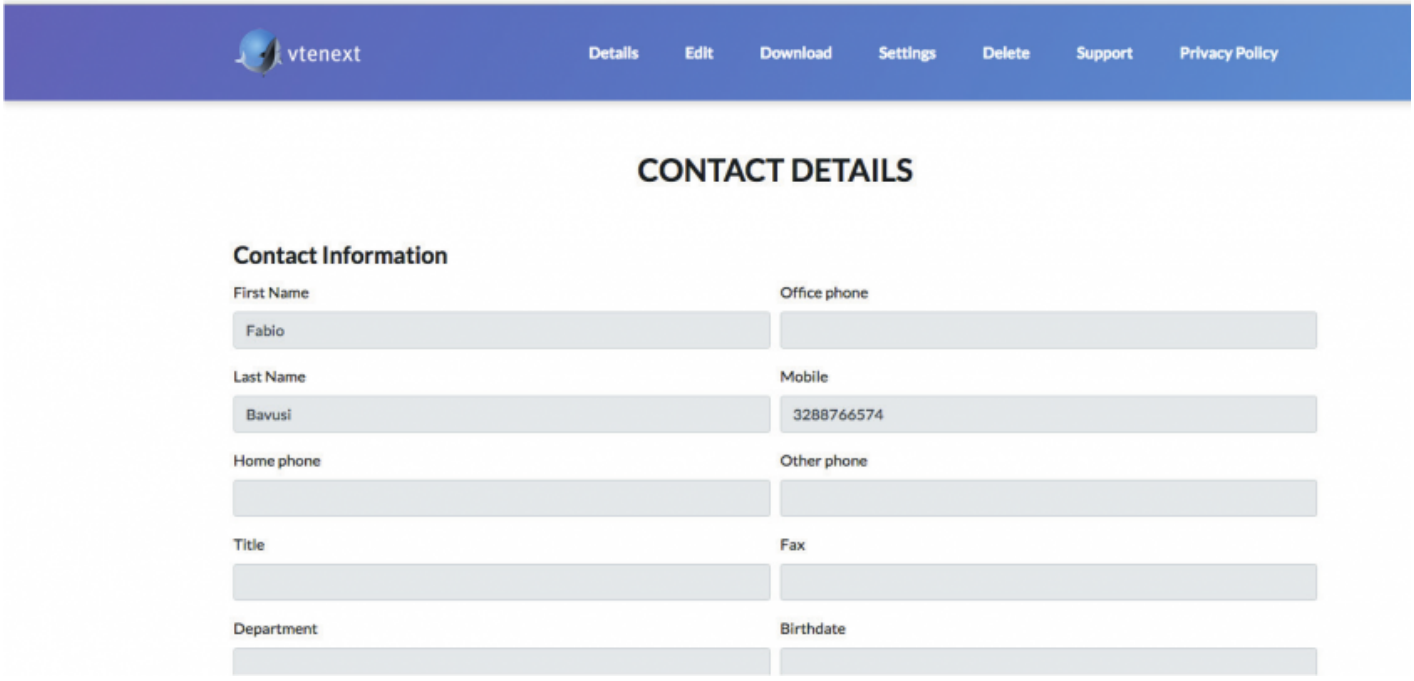

10

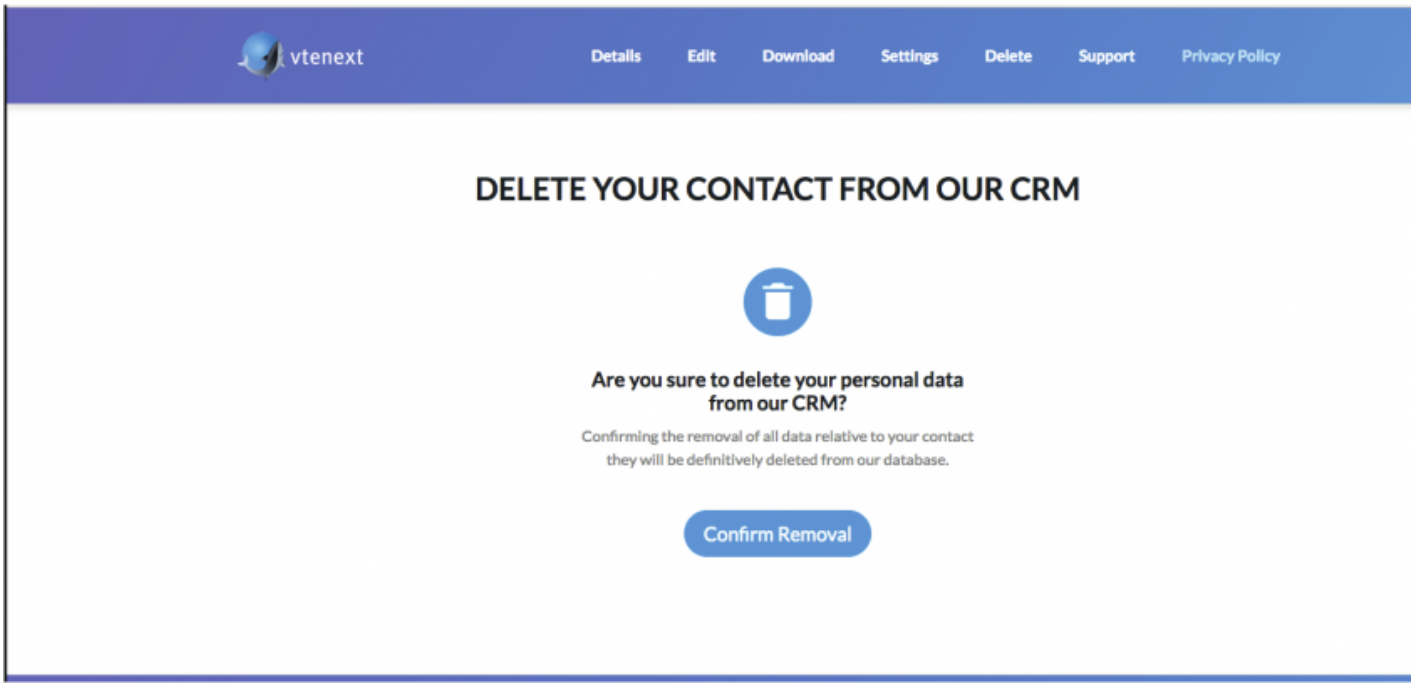

Data are always under control

The functions of the app allow therefore to manage the data processing in self-service mode.
The use of vtenext as a HUB for the collection of information from external sources such as ERP, Ecommerce, Mailing Tools, Lead Collection Form guarantees a unified management of GDPR and the autonomous maintenance of data and consent collected.

The app can also be used in the desktop version

vtenext GDPR KIT

To guarantee correct management of the operations and processes connected to the GDPR directive, vtenext
has developed the **GDPR KIT**: a complete solution that includes an additional module for vtenext, structured in the two sections **“Processing Register”** and **“Assumption Kit”**.
