

9.5 Invoices

The billing module is useful for managing the administrative part in vtenext (amounts to be paid, closed invoices, outstanding invoices) and keeping all the customer history in one platform.

The module can be used independently from the Quotes module. Companies often prepare very accurate quotes with long product descriptions, while invoices are almost always summary descriptions indicating amounts and payment methods.

The Create Invoice button from the sales order or quote master (Other menu) will open with the invoice already attached, proposing the same content.
