

14 PDF Maker

The PDF Maker module allows you to create PDF documents that are generated with the rationale of "printing and merging" the data contained in vtenext and in an export model.

The screenshot displays the PDF Maker module interface. At the top, there is a search bar and a toolbar with various icons. Below the search bar, there are two buttons: "+ Add template" and "Other". The main area contains a table with the following columns: #, Select, Template name, Module, Description, Status, and Actions. The table lists 9 templates, all with a status of "Active".
