

14.8 PDF file name

In the PDF Maker Settings tab, you can define the name of the output PDF file. This option allows you to define the file name according to your needs. It is possible to combine text strings, module variables and standard variables such as the template name, current date, etc.

The screenshot shows the 'Settings' tab of the PDF Maker interface. The 'File name' field is highlighted with a red box and contains the text: `$QUOTES_QUOTE_NO$_$#YYYY-MM-DD#$_$`. Other settings visible include: Page format: A4, Page orientation: Portrait, Ignored picklist values: (empty), Margins: Top 1.5, Bottom 1.0, Left 1.5, Right 1.5, Number format: Decimal point separator ., Decimal point number 2, Thousands separator (empty), Compliance: (empty), Status: Active, and Set as default: (unchecked).
