

17.6.2 Other functions on modules

Uninstall, import, export

	Uninstall the module: it will no longer be usable and the records contained within it will be removed
	Change the settings related to the module, repeating the previous steps. This function is only available if the module has not been previously uninstalled
	Export the XML format module (stored in RAR files)
	Delete the module permanently; before being deleted, a module in use must be uninstalled
	Import a module saved locally in XML format
