

5.7 Notes

Notes can be found in the vtenext records, located at the bottom left (available in most modules), and on the main management panel, which is accessible from the icon on the light blue toolbar.

The following options are available from the record:

- Make a temporary note, which will be already linked to the record;
- Browse previous/subsequent notes (always related to the record in question);
- Convert the note into an evolved CRM object (e.g. if a customer note gives rise to a potential, it can be converted without having to re-input the same information).

These notes can be viewed with two modes: List or Slider.

The screenshot displays the Notes interface in two modes. On the left, the 'List' mode shows a vertical list of notes. Each note entry consists of a title and a timestamp. The first note is 'New opportunities ahead' with a timestamp of '14:49'. The second note is 'Test note' with a timestamp of '14:49'. The third note is 'First tel' with a timestamp of '14:47'. Above this list is a green 'Create' button with a pencil icon. On the right, the 'Slider' mode is shown, featuring a 'Note information' section. This section has a 'Title' field containing 'New opportunities ahead' and a 'Note' field containing the text 'Pay attention to customer requests'. A blue 'Save' button is located at the top right of the slider view.

Visibility of Notes in the record is regulated by Sharing Access:

- Personal: notes can be accessed only by the author;
- Public: notes can be in read-only mode by whoever has access to the record.

Warning! The note contents cannot be filtered using the module's Filter function, nor can they be displayed as a column in the list view or tracked by means of the global search function. This is a personal tool that is independent with respect to the data entered in the record.

The main Notes page also allows the following actions:

- Browse through all the notes generated by the user in the CRM;
- Perform searches;

- Write notes that are not related to any particular object. The notes will remain private, meaning they cannot be viewed by other users.

The screenshot shows a web application interface for creating and managing notes. The interface is divided into several sections:

- Header:** Includes a search bar, a "Create" button, and a navigation menu with icons for home, user, calendar, and other functions.
- Left Sidebar:** Contains a list of notes, including "Notes - 1" (24-12-2021 15:56) and "Notes - 2" (24-12-2021 15:53).
- Main Content Area:** Displays the details of a selected note, including its title, content, and a "Note information" section.
- Right Sidebar:** Contains a "Create and link" button, a "Convert" button, a "Link" button, and a contact card for "De BRUNE CORION AL s.n.c." with details like "Assigned To", "Phone", "Industry", "Rating", "Lock Automatic Emails", and "Email".
