

16.8 Audit Trails

The Audit Trails function allows the system administrator to know what a user has done in vtenext. You can enable/disable this control via the flag in the box, relative to the selected user.

This function has been improved from version 21.01, making it centralized, with the facility for granular extraction of all activities with complete details.

**Settings > Audit Trails**
Display Audit Trail of Users who access CRM

Audit Trails
Enable Audit Trail ☒
