

18.9 Proxy Server

If your company is using a proxy server to access the Internet, you can use the Proxy Server Settings menu, as shown in the figure.

The screenshot shows a settings page titled "Settings > Proxy Server" with a subtitle "Configure proxies to access RSS feeds through the Internet". The page contains a form for configuring a proxy server. The form has four input fields: "Server Address" with the value "http://192.168.1.68", "Port Number" with the value "4400", "User Name" with the value "root", and "Password" with a masked value ".....". There are "Save" and "Cancel" buttons in the top right corner of the form area.

Settings > Proxy Server
Configure proxies to access RSS feeds through the Internet

Proxy Server Save Cancel

*Server Address

*Port Number

*User Name

*Password
