

5.2.1.1 Set Centralized Signature

The Centralized Signature makes it possible to set a default signature, identical for all crm users, with the same graphic layout and characteristics. Go to SETTINGS > OTHER SETTINGS > COMPANY DETAILS and scroll down to the bottom of the page to find the "Signature" options.

Company Details Page with the options for Signature in messages

Clicking on the EDIT button at the top right makes it possible to configure the centralized signature, using all the variables provided. The variables refer to user details and various custom input fields, e.g. for input of the current date.
