

8.1.2 Configurable products and product variants

From vtenext 20.04 it is possible to manage product variants with the new module **Configurable Products**. By following the logics of a normal e-commerce we can manage father products and the related variants. Let's make an example to better understand this function.

Product Name	Features names	Possible values
iPhone	Memory	32Gb, 64Gb, 128Gb
	Color	Black, White, Gold
T-Shirt	Size	S, M, L, XL, XXL
	Color	White, Red, Green

For each father product it is possible to create infinite variations. Let's see how:

Creating Configurable product

Save Cancel

Informazioni Configurable product

Product Name: iPhone Assigned To: User (Matteo Giarolo)

Attributes

Attributes	Name	Possible values
Memory	Memory	32 Gb, 64 Gb, 128 Gb
Color	Color	Black, White, Gold

Attributes

Attributes	Possible values
Memory	32 Gb 64 Gb 128 Gb
Color	Black White Gold

Description Information

Description:

Detail of a configurable product with values

In the end a product will have to be created (from the vtenext standard **Products** module), and then we can select the pre set variables as shown in the image below. The product's name, for example iPhone 32Gb, and the selected variables will be Memory 32Gb and Color Black. Moreover, it will be possible to add a **SKU** (Stock Keeping Unit) code for the product. This identification code of a warehouse-managed item is usually assigned to a product in order to identify it.

Product iPhone

Vendor Part No: Mfr Part No
Product Sheet: Serial No
Time created: 01-06-2022 12:40:20
Modified Time: 01-06-2022 12:47:27
Product Line: GL Account: 300-Sales-Software
UPC Code: Creator: Variant of: iPhone
Provvigione (€): 0.00

Variant information

Memory: 128 Gb
Color: Gold

Pricing Information:

Unit Price (€): 0.00
Commission Rate (%): 0
Unit cost (€): 0.00

Detail product with variant information set

When a new quote is filled in it will be possible to create a new iPhone product, like we can see in the example, this will allow us to search all the possible variants. Note that, from the quote module, the research of products with variants works only if at least a product with the related variant exists.
