

14.10 Language Labels in PDF Maker

The **Labels** feature available in PDF Maker is very important if you want to manage PDFs in multiple languages.

When you open a PDF template for editing (or during creation, it makes no difference), a tab called **Labels** appears at the top.

Clicking on it takes you to the screen shown in the following image:

By analyzing it, you can see two main dropdown menus called **GENERAL LANGUAGE** and **MODULE LANGUAGE**. Let's take a look at what they are used for:

General Language	This section contains the label values from all CRM modules. Here you can find any type of label to quickly insert the desired entry. When the PDF is generated, the variable will automatically be translated into the selected language.
Module Language	This section contains the label values of the modules primarily involved in the configuration. For example, if you are creating a PDF for the Quotes module, you will have access not only to the labels of the fields within the Quote itself but also to those of related modules — such as Account or Contact .

Let's suppose you want to include the following values in your PDF:

Company Name: ELECTRO SpA

Phone: 123456789

By selecting in the **MODULE LANGUAGE** dropdown first the value *Company Name* and then *Phone*, you can obtain the variables corresponding to their respective labels.

Then, by returning to the **Properties** tab, you can locate the variables that define the actual field values (which the labels refer to).

This will result in the following setup:

%M_Account Name%: \$QUOTES_ACCOUNT_ID\$

%M_LBL_LIST_PHONE%: \$R_ACCOUNTS_PHONE\$

PDF EXPORT IN LANGUAGE

Finally, by going to the module for which the template was created and opening the desired record, you can export the PDF in the selected language.

Simply click on the three dots at the top right (the **MORE** button), choose the template, select the language from the dropdown menu, and click **Export** or **Send by Email**.

The screenshot displays the vtenext CRM interface. The main content area shows a quote record for 'Quote Davis - vtenext Total 2'. The 'Quote Information' section is expanded, showing details such as 'Quote No: QUO11', 'Quote Stage: Accepted', 'Contact Name: Davis Jennifer', 'Account Name: demovte', 'Assigned To: davide.bonamini (Davide Bonamini)', 'Modified Time: 14-03-2025 14:37:46', and 'Totale Provvigione (€): 250.00'. A red arrow points from the 'Quote No' field to the language dropdown menu. The dropdown menu is open, showing a list of languages: 'US English', 'IT Italiano', 'NL Dutch', 'DE Deutsch', 'PT Portugues', 'RU Русский (Beta)', 'PL Polski (Beta)', 'FR Français (Beta)', and 'ES Español (Beta)'. The 'US English' option is highlighted. A red arrow points to the 'US English' option. To the right, a 'More' menu is open, showing options like 'Create and link', 'Generate Invoice', 'Generate Sales Order', 'Review Quote', 'PDFMaker', 'Duplicate', and 'Delete'. A red arrow points to the 'PDFMaker' option.
