

5.2.6 Other Settings of Messages Module

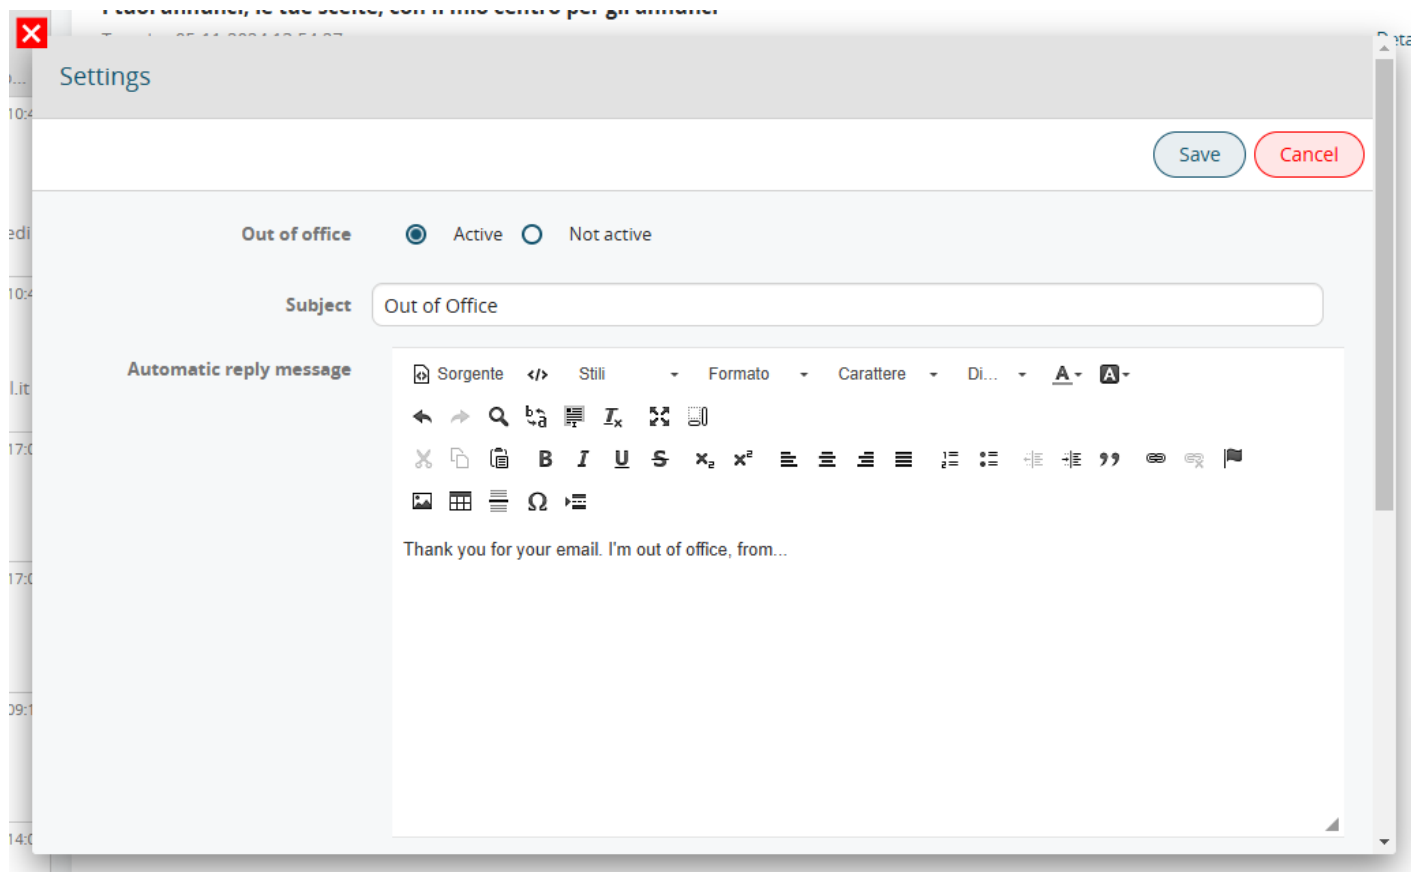

- **Layout:** change the emails list layout
- **Filters:** set up filter rules for automatic transfer of emails into folders
- **POP3:** set up a secondary account in POP3 mode

Warning! Once a secondary account has been configured in POP3 mode, a copy of the secondary account emails will be created on the email server of the main account. The main account mailbox may therefore tend to run out of storage space.

Out of Office

From version 19.10 an automatic “Out of Office” notification can be set in order to respond to emails informing the sender of your out of office status. Clicking on  from the Messages

module allows you to access this function, by means of the specific item of the same name. An additional window will open in which you can Enable or Disable this function and set the automatic replay message text.

Out of Office Activation Screen with Customizable Auto-Reply Message for Email

Period of time

Start 12-11-2024 09:00 ☐ All day
(dd-mm-yyyy)

☒ Finish 22-11-2024 18:00
(dd-mm-yyyy)

☒ Pause push notifications on Wilson

Reply only to known addresses ☐

Activate for accounts
formazione.vtenext@gmail.com

The notification is sent to the same address only one time every 5 days

Out of Office Configuration Screen to Set the Time Frame for Automatic Email Responses

The **“Out of Office”** feature has also been extended to the Conversations module, so that when a user is unavailable for a certain period, if they are involved in a conversation, a warning message will appear indicating their absence:

Administrator
Hello, this is an automatic message. I will be out of office from Monday 26-01-2026.
11:42

Pause push notifications on Wilson

It is also possible to pause Wilson app push notifications when an 'Out of Office' interval is set. By activating the specific checkbox shown in the image, app notifications will no longer be delivered during the designated period.
