

6.1.6 New Newsletter editor

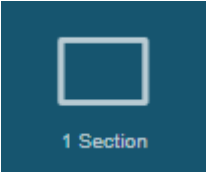

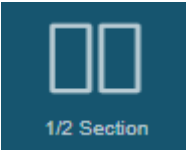

From vtenext 20.04, a new newsletter editor is available and allows creating newsletter in a easier way. HTML code knowledge is not needed, all the elements needed can be managed using the drag and drop function.

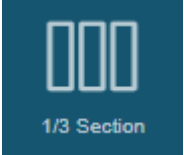

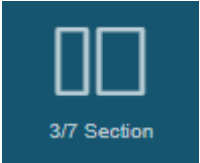

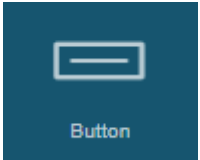

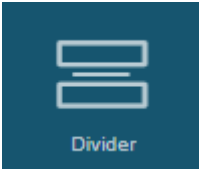

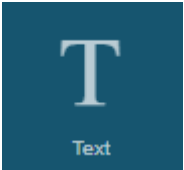

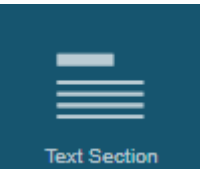

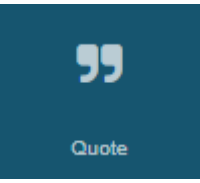

Here you can see the new tool:

Here below you can find all the icons of the tools available:

	Allows to test the preview choosing among: • Desktop • Tablet • Mobile
	Allows to activate/deactivate the templates' construction lines
	Allows to activate/deactivate the full screen display mode. This mode eases the construction of templates
	Allows the HTML code visualization

	Allows the template import by coping and pasting the source code
	Allows to momentarily hide all the pictures in the template
	Allows to edit the source code
	After selecting an element in the newsletter template click on this icon to access all the editing options available (Size, Style, Decorations)
	After selecting an element in the newsletter template click on this icon to access all the setting options available. The options change according to the selected element. Here below some examples: • Text: ID e Title • Link: Title, Href (Url), Target (Same window, Different window) • Image: Alt • ecc.
	Allows to display the layers on where the template is built. In this way the user can easily switch from one div to another.
	Activates the display of all the blocks and elements available to build the template
Available blocks	
	Adds a tab with a cell
	Adds a tab with two cells vertically divided

 1/3 Section	Adds a tab with three cells vertically divided
 3/7 Section	Inserts a tab with two cells vertically divided, 25% on the left and 75% on the right
 Button	Adds a button with the possibility of generating a link and changing its title
 Divider	Adds an horizontal division line
 Text	Tool to add a text block, text can be formatted only by diversifying the blocks (each block can have only one format)
 Text Section	Tool to insert a text area
 Image	Allows to insert an image, uploading it from the computer or linking the URL
 Quote	Allows to insert a “quoted” text

 Link	Allows to insert a link. Once this tool is selected click on the settings icon to set the link's URL
 Link Block	Allows you to set an area, where you can insert an image that will have to be linked, for example, to your website
 Ordered List	Tool to create a numbered list
 Unordered List	Tool to create a bullet list
 Unsubscription Link	Allows to insert the unsubscription link
 Preview Link	Allows to insert the preview link
Spacer block	Tool to insert a space, among the newsletter's elements
